

Marking Criteria for Assignment 2

Total points: 100

Weight: 30%

Task 1 (35 points)

- Task 1.1. 30 points:
 - a. Define RNN: 10 points (“def __init__”: 10 points; “def forward”: 5 points)
 - b. Training: 20 points (one training epoch: 5 points; evaluation pass: 5 points; full training run 5 points; the rest: 5 points)
- Task 1.2. 5 points
- Note: After running 5-epochs, an accuracy of over 55% is expected.

Task 2 (10 points)

- Task 2.1. 5 points
- Task 2.2. 5 points

Task 3 (10 points)

- Task 3.1. 5 points
- Task 3.2. 5 points

Task 4 (45 points)

- Task 4.1. 5 points
- Task 4.2. 10 points
- Task 4.3. 10 points
- Task 4.4. 20 points
 - Software design: 5 points
 - Diagrams (only necessary for discussions on your test results): 5 points
 - Discussions: 10 points (any insights, any observations and/or any lessons. Students are expected to learn something from their experiments)
